

BoosterpaQ Hydro MPC-E

One pump in operation
Variable Speed

Three pumps in operation
Variable Speed, same
speed for all pumps

- The MPC-E system maintains a constant pressure through continuous adjustment of the speed of the pumps.

- The system performance is adjusted to the demand through cutting in/out the required number of pumps and through parallel control of the pumps in operation.

- Pump changeover is automatic and depends on load, operating hours and fault.

- All pumps in operation will run at equal speed.
