

GET ANOTHER TOILET AND ADD VALUE TO YOUR HOUSE

As shown in the drawing above, the six Sololift+ models allow you to install new facilities anywhere you want. Little new pipe work is required, so real home improvements can be made at very low cost. For example, you can:

- Install toilets in closets, under your stairs, basement, loft level etc.
- Use basement space to add another kitchen or utility room
- Design low-cost bathrooms for holiday cottages, conversions, etc.

Installing new facilities not only increases your everyday quality of life, it also increases the value of your property. And the elegant design of the Sololift+ means that you won't have to compromise on style.

The Sololift+ is part of the innovative Grundfos product family

Grundfos has been developing pumps for domestic use for more than 40 years. Throughout our long history, our focus has always been firmly on the customer when designing our innovative high-quality solutions for heating, water supply and wastewater applications.

In fact, you probably already own one or more Grundfos pumps without realising it – that's how reliable they are. The Sololift+ is no exception: a compact pump unit that makes it easier than ever to add new facilities in any house.

under shower cabinet

SOLOLIFT+ MAKES THE MOST OF YOUR HOME

Add new facilities anywhere you want

The Sololift+ lifting stations give you a whole new range of opportunities when designing your home. Quite simply, the Sololift+ makes it easier than ever to add a new bathroom, kitchen, or utility room anywhere in the house. Yes, anywhere at all. And you won't need any of the costly pipe work often associated with a new bathroom or other facility.

Elegant design for any setting

The attractive, discreet design of the new Grundfos Sololift+ lifting stations suits every style of interior design. The smooth lines and rounded edges make them easy to incorporate into both existing and all-new facilities.

Quality in every detail

The Sololifts+ range are manufactured to meet the strict Grundfos quality standards, so they don't just look good – they work well too. Every part of the product is thoroughly tested, ensuring reliable performance, very low noise levels, and a long lifetime.
